

41. An image information transmission unit provided with:  
pen input means able to enter character or drawing information by  
operating a pen;

conversion means for converting the character information entered by  
said pen input means into a specified code;

designation means for designating that the information entered by said  
pen input means is a facsimile number; and

transmission means for transmitting the character or drawing  
information entered by said pen input means or the code converted by said  
conversion means, based on the facsimile number of an addressee designated  
by said designation means.

42. The portable communicator according to claim 35 in which said  
portable computer is provided with mark change display control means for  
displaying the mark indicating execution replacing said identification  
marker when the code transmitted from said image retrieval means is the  
code indicating execution of the selected item.

---

#### REMARKS

Please enter the above amendments before consideration of this  
application.

Respectfully submitted,
